
blachere®
illumination

Manifesto

We think that illuminations bring light to much more than urban areas and living spaces:
We believe in their power to amaze, enlighten and tell beautiful stories. The way we create and innovate takes into account each expectation and every little detail.

We are committed to product quality and to protecting the environment and humanity. Goodwill and an ethical approach are at the heart of our culture and can be found in all our projects worldwide.

We are Blachère and we have been producing illuminations for 45 years with care and passion.

Not a contract document.
The sizes and wattages of motifs may be subject to change for technical reasons.
All our products are CE marked meaning that they meet electrical security norms and electromagnetic requirements. All our motifs, designs and graphics are protected by the INPI, the OMPI and current industrial and intellectual property laws. Reproduction of any kind, in full or part, is strictly forbidden without written authorisation of blachere illumination s.a.s.

What drives us

In 1973, Jean-Paul Blachère invented a new profession and a signature style all of his own by lighting up living spaces, towns and cities.

We now have over 400 people worldwide working to transform the routine. Across towns, villages, capital cities, shopping centres, parks and monuments, our projects reflect our creativity and ability to invent decorations with increasingly innovative solutions.

While we aim to create beautiful pieces around the world, being eco-friendly is one of our priorities. Although half our research & development budget goes into new organic materials, we are at the very beginning of our eco-friendly journey and doing everything we can to limit the impact of our products and protect the planet.

Our network

Blachère lights up the world with its 26 subsidiaries.
Each country has its own traditions and culture. We know every location inside out and respect what makes it tick, meaning we can offer the most beautiful and, above all, appropriate solutions. Because hopes and challenges vary between countries like Mexico, Sweden and Germany, we provide the best team for every challenge from client brief to installation.

Whether decorating historic monuments, illuminating streets or transforming majestic fountains in Paris, Limoges or Moscow, we aim to pay tribute to the location while respecting its history.

65% of french municipalities illuminated

15 of the 20 largest cities

1000 cities worldwide

500 shopping centres decorated worldwide

Sustainability

Our commitment to protect the planet isn't just something we talk about, it's been in our DNA for over 10 years.
So, it was only natural that we take the same eco-friendly approach for our clients when creating new solutions for them. Having been the first to make LEDs the norm, we are now revolutionising our illuminations' structural design thanks to our BIOPRINT invention. With BIOPRINT — a recyclable and biodegradable material that comes from sugar cane — we can remove over 80% of the aluminium from our 2D decorations (more info p.14 to 17).

We also have our NORDIKA tree which looks just like a real Christmas tree but avoids deforestation (see p.88 to 91) and ORCHESTRA: the app that allows for smart, optimised illumination and electricity management (see p.208 to 211).

Common sense and compassion also underpin how we behave as a business as we aim to significantly and sustainably reduce our carbon footprint:
We are taking action in this area including making our communication tools paperless wherever possible, recycling our waste, generating green energy at our wind farm, installing solar panels and replacing our fleet with hybrid vehicles.

We are also involved in the process of obtaining ISO 14001 certification.

Interactivity

Amaze, surprise, move...as well as illuminations, we develop solutions to make our decorations increasingly lively and interactive. We do all we can so visitors can really get involved, such as enabling them to change decoration colours and integrating augmented reality for unforgettable photos.

We have developed a range of interactive products and mobile apps to use in towns, cities or shopping centres to have fun, make an impression and leave the public wanting to extend their visit and return. Interactivity is even more attractive than illuminations. It brings generations together to share a unique experience. The public stop being onlookers and become involved.

Expertise

We are very fond of our beautiful local region: Provence. Our "haute couture" workshops are in Apt. 60 staff usually work here, but this number rises to over 120 in our peak season. Each year, over 6,000 bespoke decorations are created: giant trees over 25 metres tall, imposing fountains, and multicoloured tunnels 100 metres long. We look after everything from metalwork to the most complex cabling.
In total, 50,000 standard decorations are made annually at our production sites.

Because imagination has no limit and know-how is our specialty, do not hesitate to contact us to create special lighting decorations totally personalized :
Walkthrough tree, huge size, custom design, multi-coloured animation, the possibilities are endless!

An international team of over 30 designers create our decorations: everything from cross-street to spectacular frontages for major stores and fun characters. We start each project with a clean slate and create motifs and designs to suit our clients' wishes.
Over half the decorations in this catalogue are updated each year in line with the latest trends and influences from around the world.

The French government have also awarded us EPV certification: a distinction given to French companies that showcase artisanal and industrial expertise and export abroad.

We are the only French illuminations company to have obtained ISO 9001 certification.

Bioprint

The first recyclable and biodegradable structures

Having been the first company to take LEDs mainstream, we are now revolutionising the design of our illumination structures with our Bioprint invention: an innovative biodegradable material. These decorations are then recycled, like our garlands and electrical components.
Bioprint comes from biosourced and GMO-free sugar cane, which is then turned into dehydrated bioethanol at a French laboratory.
When the granules arrive at our workshops in Apt, France, they are dyed with our own colours and the material is then injected into our 3D printers which produce colourful, biodegradable and recyclable structures.
A process that generates no waste at the manufacturing stage and allows total recyclability of the motif at the end of its life, thanks to the grinding of the frame in a form of granules.

This new material allows us to remove more than 80% of aluminium on our 2D motifs, which has a considerable impact on our carbon footprint. Indeed, the bioprint manufacturing process emits 10 times less CO2 than aluminium.

As well as being eco-friendly, this innovation means we can design highly creative and colourful structures that are just as stunning at night as they are during the day and do not leave any trace on the natural environment.

Biodegradability

Biodegradation is the breakdown of organic matter by microorganisms.

Substances are said to be biodegradable if external living organisms can cause them to decompose into separate elements without harming the natural environment.
Our decorations biodegrade slowly, meaning they can be installed outdoors for long periods without this causing aesthetic or mechanical damage. One advantage of this slowness is that it minimises the greenhouse gases generated when the complex molecules that make up our revolutionary material biodegrade.
While industrial composting is one way to sensibly manage this biomass the eco-friendliest approach is to recycle the material. By doing this, daily waste production can be minimised.

BIOPRINT granule decomposition stages.

RECYCLABLE & BIODEGRADABLE BIOPRINT STRUCTURE

The entire structure onto which the lighting components are wired is made using **our revolutionary new Bioprint material available in different colours.**

RECYCLED ALUMINIUM FRAME

This sleek aluminium frame is used to maintain the **Bioprint** structure. After use, the aluminium in all our decorations is **collected and processed by an accredited organization.**

RECYCLED ELECTRIC COMPONENTS

All the garlands and other electric components we use in our decorations are **collected and recycled by ESR-Récylum** which is approved to process waste electrical and electronic equipment from commercial sources.

Green

This sweet and gentle collection combines tradition and a sense of poetry to warm up Christmas with its warm white and green hues. Arabesques, bows and delicate ropes light up the streets of towns and cities to provide a romantic feel.

Nordika

The christmas tree better than a real one!

Who hasn't dreamed of a huge Christmas tree? However, a natural tree takes 30 or 40 years to reach a height of 12 m. To avoid being involved in deforestation and cutting down these majestic four-decades-old trees, we have invented Nordika.
Pre-illuminated with a SlowGlow effect, and easy to put up and store away, they are perfect replicas of their natural cousins thanks to their design and incredibly realistic look.

OPTIONAL TREETOP

HYPER REALISTIC CHRISTMAS TREE BRANCHES

WOOD-EFFECT TRUNK

WOOD EFFECT STAND AVAILABLE

The Christmas tradition

What could be more iconic than a majestic Christmas tree during the holiday season?
This Christmas, Blachère has reinvented this festive classic, taking care of every little detail:
The perfectly regular branches, realistic high-quality finish and majestic size make this a must-have product.

Just as you carefully consider how you will decorate your Christmas tree at home each year to surprise and amaze your family and friends, you can personalise your Nordika to make it unique: hang baubles from the branches, add lit toppers, or put them in a wooden stand.

Our NORDIKA tree remains a lasting, high-quality investment in line with the very best of Christmas tradition.

Play Magic

Play in augmented reality!

Allowing audiences to do things like take a photo with Father Christmas or play with Charlie the Unicorn, our augmented reality apps add virtual characters into the real world, leaving the public laughing and amazed.
Children and adults can easily take part in the fun using a smartphone enjoying an unforgettable experience that transforms reality into a unique performance.

How does it work?

For the public, the idea is simple: When users approach the PlayMagic banner, the app they have pre-installed on their phones automatically unlocks to give them access to the games.
They can then share the experience on their social media pages. The public app features your branding and a link to your website or social media.

For the city:
The games app has a subscription model valid while the illuminations are up, with games updated each year.
Apart from this, all you need to do is install the banner near the illuminations to tell the public they can enjoy a free game on their phone in the location. There is no need for any connection.
The app's success also depends on you advertising it on displays in your town/city and on your social media pages.
We can assist you in setting up your communications (Réf. ARCOM below).

Games available:

Reference	Description
AR001	3 games pack (chosen from the 7 existing games) + 1 Flag
AR002	5 games pack (chosen from the 7 existing games) + 1 Flag
ARTOT1	1 additional Flag
ARCOM	Augmented Reality Communications Pack (non-printed poster, web banner and smartphone-format image).

Play Colors

Change the colour of the illuminations!

Play Colors is a smartphone application that allows the public to control the colour and the animation of the illuminations in their city or shopping centre during a play session.
Changing the colour of the garlands with just one click, launching comets of light with their fingertips, making the lights pulse to a rhythm like a heartbeat by tapping the screen of their smartphone... these are just some of the games available on this app.
The Selfie mode allows the user to immortalise this experience in front of the illuminations and share the results on social media, so inviting their friends to come and try it themselves.

How does it work?

For the public, the principle is very simple: The user downloads the app to their smartphone and goes to the location of the illuminations. They choose their play area and start a session. They can then share their gaming experience or selfie on social media.

For the city: The city decks trees or covers the facades of buildings with RGB garlands and control boxes (see refs below). The Play Colors app is tailor-made for our customers by our Blachère R & D teams. Together with you, we identify the different play areas in the city or the shopping centre and develop a fully personalised smartphone app with the logo of your choice.

The success of this app depends on your own communications via urban signage or posts on your social networks promoting the interactive game for both children and adults, as widely as possible.

We can assist you in setting up your communications.

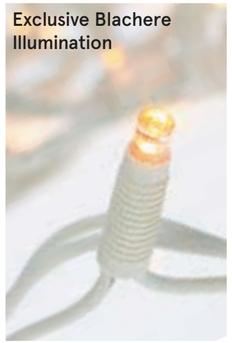
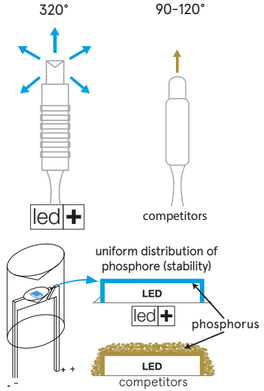
Blachère LEDs

led+



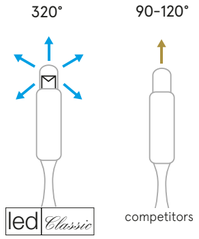


By considering practical use in their innovative designs, our R&D department have devised the all-new LED+ in both static and slowflash editions to make your projects come alive! Our new and exclusive LED range is the outcome of a long-term collaboration with Nichia®, the world leader in LEDs. The range is:

+ bright, + robust, + long lasting, + consistent in terms of color

The new technical features of LED+:
- ▶ **Design is optimised and registered**
to promote the luminous efficiency of our product (inverted cone principe).
- ▶ **Thermal dissipation is maximised**
for longer LED life
- ▶ **Uniform phosphorus deposition**
for a uniform lighting effect.
- ▶ **2 years guarantee**
- ▶ **Optimum protection index: IP66 / IP69**
- ▶ **Octoplus 230V Connection System by Blachère IP67**

led *Classic*



Our standard LED model!

Bright and stable (lifespan and colour), our Classic LEDs also have inverted cones (for even light distribution).

Production is closely monitored to make sure the quality is optimum and competitive on the market.

garlands with B22 sockets - Power supply included

	description	cable section	B22
9 m	garland of 20 sockets	■ 2 x 1,5 mm²	**G1C**
15 m	garland of 40 sockets	■ 2 x 1,5 mm²	**G2C**

product info

Customise your garland with different bulbs suggested on p 199 and make up your own eye-catching effect.

Replace your old incandescent bulbs with LED bulbs, new technology with vintage look but more economical so more ecological.

Ideal for your summer decorations, creating a festival atmosphere.

Starflashs® Led bulbs

registered design

In outdoor use, must be mounted on garland with B22 bulbs minimum IPX4 with waterproof seal fitted.

description	socket	packing	P (W)	max joule	reference
pure white	B22	unit	1 W	0,5 joules	**F722-L**
pure white	B22	unit	1,3 W	2 joules	**F732-L**

product info

A historic product that's easy to use on a garland with a B22 socket.

Produces about 1 flash every 3 seconds.

B22 & E27 bulbs

LDL B22/E27 range (registered design)

série LDLH B22 SMD

In outdoor use, must be mounted on garland with B22 bulbs minimum IPX4 with waterproof seal fitted.

Bulbs : low power consumption - Note use the appropriate power (20 mA i.e 5 VA) to calculate the rating of your network (cable cross-sectional area, circuit breaker, power required etc.). Use 0,5W per bulbs to calculate the power consumption.

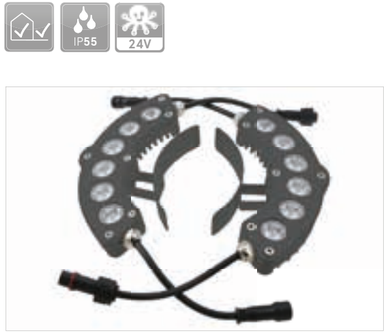
product info

The LDL series is a classic Blachère illumination. With this patented model, the arrangement of the LEDS in the bulb creates a "filament effect" like in old incandescent bulbs.

The polycarbonate bulb guarantees increased strength (IK06).

PRJA-W

Led Projectors



PRJA-W / PRJA

PRJP-01+ / PRJP-01W+

Rounded projectors for trees (set of 2)

dimensions	LED	voltage	P (W)	reference

inclus		1 m	230V/12V	12W	lot de 3	**PRJP-01W+**

info produit

Illuminate tree trunks or branches with our curved micro projectors! They may be small, but they are super powerful!
Bright and elegant results, easy to set up.
Totally safe for the public (24V) and trees (elastic fasteners + protective foam).

Extensions and accessories p218.

With these 3 projectors that come with a 230V/12V transformer, you can quickly and easily light up shrubs, bushes, planters, etc.
Their stake means they can be easily planted in the ground.

DMX controllable LED projectors and wall washers

product info

Rotary projector
Can be used manually or with DMX.

N.B.
- Gobo size M-66 mm.
- Pole mount bracket or wall mount sold separately.

Octoplus by Blachère®

Exclusivity

Octoplus by Blachere® 230V connector, protection rating **IP67**, according the European standard EN60529 on the degree of protection provided by enclosures.

Safety extra-low voltage connector 12/24V

Octoplus is the connector that enables **fast and multiple connection** between our decorations and most of our range of garlands.
Each item that is marked "Octoplus" can therefore **be connected** to another "Octoplus" item.
This means **the combination of items is infinite** just by simplifying the electrical connections.

Octoplus®: Example of use No1

For a transverse motif
