Blachere Illumination

light is our link

Manifesto

We believe that illuminations bring more than just light to urban areas and living spaces:
We believe in their power to amaze, to enlighten and to create fairytales.
The way we design and develop our illuminations incorporates those qualities in every detail.

We are committed to produce items of quality whilst doing our utmost to protect both the environment and humanity.

Goodwill and an ethical approach are at the heart of our company's beliefs and can be found in all our projects worldwide.

We are Blachere and we have been producing illuminations with care and passion for 45 years.

What inspires us

In 1973, Jean-Paul Blachère invented a signature profession that lights up living spaces and cities.

Today, we are a global company of over 400 people committed to change everyday life for the better.
Whether designed for capitals, villages, cities, shopping centers, parks, monuments etc. our projects reflect our creativity and our ability to invent increasingly innovative decorations and solutions.

We want to create beautiful pieces all over the world, for sure, but keeping in mind one of our top priorities: eco-responsibility.
Half of our research and development budget is allocated to ecoresponsible innovations.

We make every effort to limit the impact of our products to protect the planet and this marks just the beginning of our pursuit of eco-responsibility.

Our network

Blachere illuminates the world thanks to its 28 subsidiaries.
Each country has its own traditions and culture. For us, learning about the DNA of each place and respecting it is vital, to best carry out, not only magnificent, but coherent projects. For the stakes and desires are not the same in Sweden, United States, France or Dubai, we match each challenge with the perfect team to help you set up illuminations from the first contact.
Whether enhancing historic monuments, illuminating an avenue, transforming a majestic fountain or decorating a village square in Paris, Moscow or London, we aim to glorify places while respecting their history.

65% of french towns illuminated (with more than 5000 inhabitants)

17 of the 20 largest cities in France

1000 cities worldwide in more than 80 countries

500 shopping centres decorated worldwide

Sustainability

Our commitment to protect the planet isn't just something we talk about. It's been in our DNA for over 10 years.
So, it was only natural that we take the same eco-friendly approach for our clients when creating new solutions for them. Having been the first to make LEDs the norm, we are now revolutionising our illuminations' structural design thanks to our eco-responsible and recyclable materials. With **Bioprint** — that comes from sugar cane — and **Recyprint** — designed with recycled plastic bottles — we can remove over 80% of the aluminium from our 2D decorations.

We also have our NORDIKA tree which just looks like a real Christmas tree but avoids deforestation Half of our research and development budget is allocated to ecoresponsible innovations.

Common sense and compassion also underpin how we behave as a business as we aim to significantly and sustainably reduce our carbon footprint.
We are taking action in this area including making our communication tools paperless wherever possible, recycling our waste, generating green energy at our wind farm, installing solar panels and replacing our fleet with hybrid vehicles.

Quality

We built on our 50 years of experience and 15 years of ISO certification to grow, optimize our processes and create our own system based on quality continuous improvement and monitoring.

Our Quality policy is based on daily commitments:
We ensure compliance with regulatory obligations.
We make sure that our quality commitments and deadlines are respected to satisfy our customers.
We foster creativity and innovation in products, technology and business.
We are continuously seeking improvement, performance and efficiency in our processes, including outsourced ones.
Our strategy is in line with the principles of Corporate Social Responsibility
And finally, we encourage the commitment and responsibility of all our employees in the application of this Quality policy.

We are Blachere and we have been producing illuminations with care and passion for 45 years.
We look forward to continuing to do so.

Know-how

An international team of over 30 designers create our vast range of decorations: everything from transverses above the streets, to spectacular facade decor for major stores and fun characters.
We start each personalized project with a clean slate and create new motifs and designs to suit our clients' wishes.
This year we are renewing our catalog with more than a hundred new decorations, designed according to trends and influences from around the world.

60 staff members work in our «haute couture» workshops in Apt (Provence French region), and more than 120 during high season. Every year, they produce more than 6000 custom-made decorations: giant fir trees over 25 metres long, monumental fountains or multicoloured tunnels of 100 metres long. All requiring skills in ironwork and in the most complex cabling.
For 5 years now, our facilities have been featuring 10 wide-format robot printers. They give us an extraordinary stylistic freedom and help us creating colourful eco-responsible illuminations in Bioprint and Recyprint.
A total of 50,000 series decorations are manufactured each year at our production sites.

During the Logistics Department's peak season, 60 trucks are leaving everyday our dedicated 12 loading platforms where they come and collect our decorations. They will then carry the illuminations to the cities, villages and shopping centres for the holiday season.

In 2016, the government has awarded us the French EPV label which singles out French companies with artisanal and industrial know-how exporting abroad.

Our range of ecoresponsible decorations

Protecting the planet: not just an option – our duty.

Our R&D department is constantly looking for ethical materials for the design of our structures. Having been the first to make LEDs the norm, to recycle our garlands and revolutionize our illuminations thanks to BioPrint - a recyclable and biodegradable material - we have also launched Recyprint, a range of decorations designed from plastic bottles.
We have 5 years of experience with this large format printing process, testing its resistance, making adjustments and mastering this tool, which we were the first to use in the lighting market. Our innovations are protected by a large number of patents.

Ecological design of our sets.

Our decorations are equipped with a recycled and recyclable aluminium frame designed to support the structure and printed with our 3D wide-format printers in Bioprint or Recyprint. The 100% LED lighting components are recycled after use and are all interconnected with the Octoplus system.
These brand new eco-responsible materials allow us to remove more than 80% of aluminium from our 2D motifs, which has a substantial impact on our carbon footprint.

Indeed, our Bioprint or Recyprint emits 10 times less CO2 than aluminium.

Eco-responsibility is at the heart of our strategy. Now and more than ever. And we are committed to constantly thinking about innovations and ethical materials to create beautiful and magical things, while protecting the planet and people.

BIOPRINT **OR RECY**PRINT RECYCLABLE STRUCTURE

The lighting components are wired onto a structure entirely made from our revolutionary new **eco-responsible materials, available in different colours.**

RECYCLED ALUMINIUM FRAME

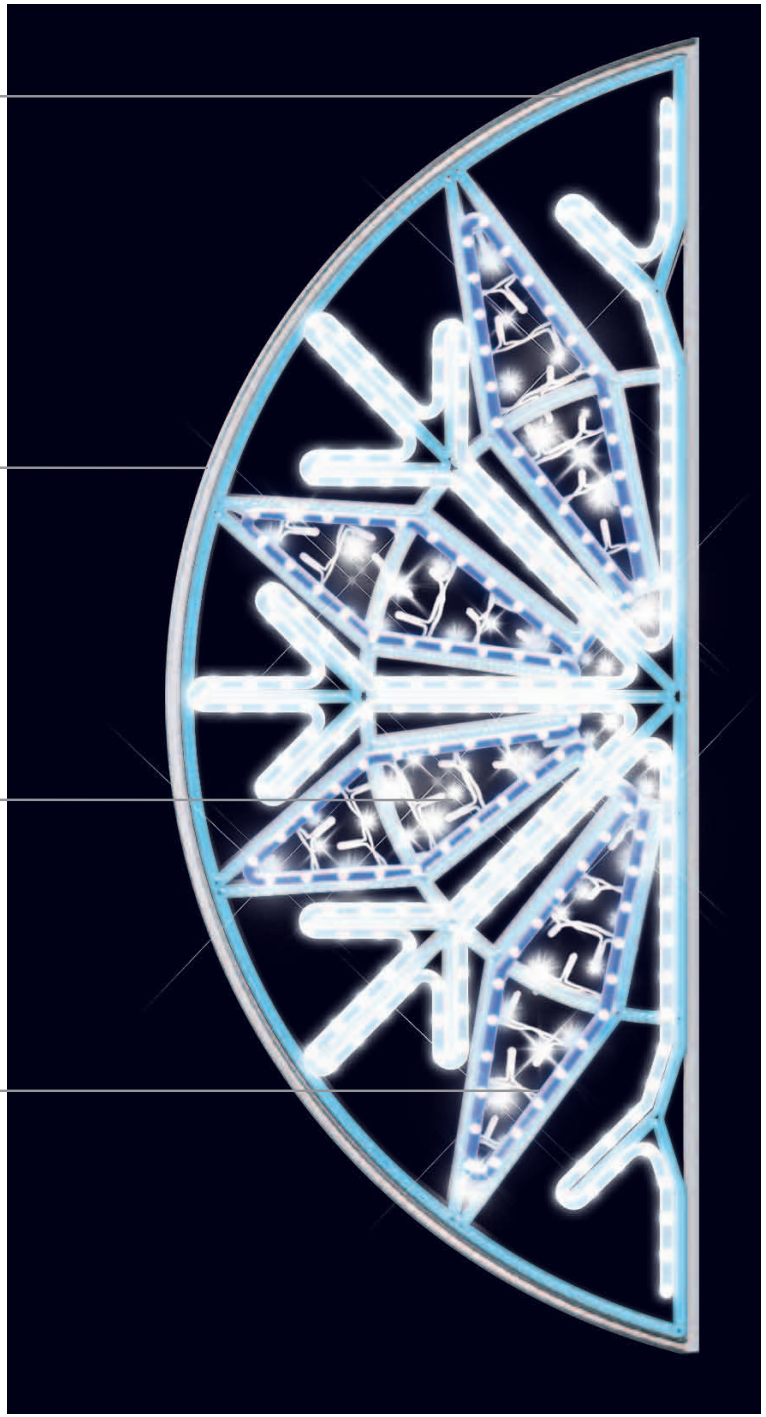
We use this aluminium frame and its sleek design to support the **Bioprint and Recyprint** structure. The aluminium used to manufacture all of our decorations **is then collected and processed by a certified body.**

OCTOPLUS INTERCONNECTIVITY

The optimization of the interconnectivity between our different lighting components allows a multitude of assemblies while limiting the number of connection accessories.

RECYCLED ELECTRIC COMPONENTS

An eco-organization approved for the process of professional WEEE (Waste Electronic and Electrical Equipment) collects and recycles all our garlands and other electrical components used for decorations.



Bioprint

A recyclable and biodegradable biomaterial made from sugar cane

Bioprint designs are made from biosourced GMO-free sugar cane which is turned into dehydrated bioethanol at a French laboratory. When the granules arrive at our workshops in Apt, France, they are dyed with our own colours. The material is then injected into our 3D printers which produce colourful, biodegradable and recyclable structures.

A process that reduces the waste at the manufacturing stage and allows total recyclability at the end of its life..

"Biodegradation" means **the decomposition of organic matter by microorganisms, with no harmful effect on the natural environment.**
Our decorations biodegrade slowly at the end of their life - **they can be installed outdoors for long periods without this causing aesthetic or mechanical damage.** One advantage of this slowness is that **it minimises the greenhouse gases generated** when the complex molecules that make up our revolutionary material biodegrade.

While industrial composting is one way to sensibly manage this biomass, **the ecofriendliest approach is to recycle the material.** By doing this, daily waste production can be minimised.

Less plastic bottles for a clean planet

500 billion bottles are produced every year and many of them end up being littered or in the oceans.

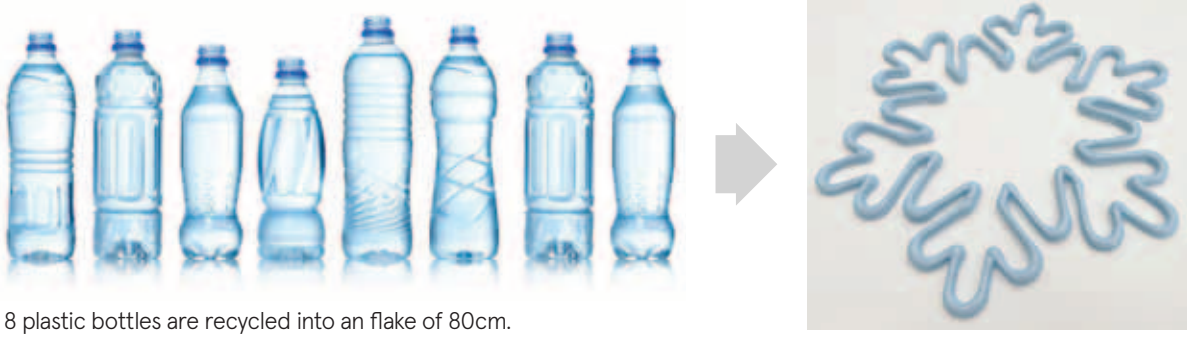
At Blachere, we have decided to tackle the scourge of plastic pollution by recycling PET (polyethylene terephthalate) from the food industry to create beautiful and innovative decorations using this unique material - rPET (recycled PET).
Indeed, each year, about 8 million tons of waste end up in the oceans and form the 7th continent - a vortex of floating plastics equivalent in size to 1/3 of Europe.

Recycling, creating, innovating.

The bottles we salvage are sorted by colour (from colourless to blue), then crushed into flakes to be shaped for extrusion. The granules resulting from this transformation are then injected into our 3D printers to create unique blue decorations.

This unrivalled method helps to limit greenhouse gas emissions and to keep our nature clean from plastic bottles as far as possible.

A real and concrete example of the circular economy.



8 plastic bottles are recycled into an flake of 80cm.

Get involved

In cleaning up the planet

Thanks to our RecyWhale or RecyTrain you will encourage people to recycle their plastic bottles. You will thus contribute to a participative and fun circular economy, **by reusing this waste to create enchanting illuminations for the year-end celebrations**.

How does it work?

You can place one of our Whales or Trains made from eco-friendly materials on your beachfronts and in your town centres to cover your recycling containers.

Each decoration features communication, making the public more aware of recycling by highlighting the goal: **To create illuminations for Christmas thanks to the bottles!**

Play Magic

Play in augmented reality!

Allowing audiences to do things like take a photo with Father Christmas or play with Charlie the Unicorn, our augmented reality apps add virtual characters into the real world, leaving the public laughing and amazed.
Children and adults can easily take part in the fun using a smartphone enjoying an unforgettable experience that transforms reality into a unique performance.

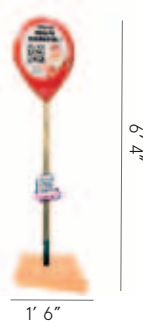
How does it work?

For the public, the idea is simple: When users approach the Play Magic banner, the app they have pre-installed on their phones automatically unlocks to give them access to the games.
They can then share the experience on their social media pages. The public app features your branding and a link to your website or social media.

For the city:
The games app has a subscription model valid while the illuminations are up, with games updated each year.
Apart from this, all you need to do is install the banner near the illuminations to tell the public they can enjoy a free game on their phone in the location. There is no need for any connection.
The app's success also depends on you advertising it on displays in your town/city and on your social media pages.
We can assist you in setting up your communications (Réf. ARCOM below).

Games available:

Reference	Description
AR001	3 games pack (chosen from the 7 existing games) + 1 Totem
AR002	5 games pack (chosen from the 7 existing games) + 1 Totem
ARTOT1	1 additional Totem
ARCOM	Augmented Reality Communications Pack (non-printed poster, web banner and smartphone-format image).



Create your own Bioprint scenes

Choose from these characters to create your own scene.
All the motifs presented are self-supporting on a frame but can also be manufactured in wallmount and polemount (on demand).

- **Choose your frame:** Bauble or Golden Gift (Ref. SC014 or SC015).
- **Choose 2 decorations and create your own scene:** Reindeer, House, Fir Tree, Angel, Sled, Snowflake, Snowman and Gift Packs (Ref. from SC016 to SC025) - Let your imagination run wild!

Play with light
and create a buzz!

This year, we have an entire range of interactive designs which can be installed in towns or shopping centres, captivating both adults and children:

interactive arches with motion sensors
animated scenes
giant characters with remote control

The idea is simple: select an animation on the remote control and the character comes to life with sound and light.

By making lighting interactive, passers-by take the time to stop and play with the characters and take control of the illuminations.

Thousands of photos and selfies are shared on social media.

By creating a buzz, visitors increase, coming to discover the illuminations and enjoy an unforgettable lighting experience.

Your FanPages on social media will rack up the views, and you'll gain more and more likes.

Free communication for your town at the click of a mouse.

Wooden cottage

Easily stored and dismantled

This real wooden cottage, is resistant, UV and weather-proof and is also convenient to install. It can be dismantled quickly and stored easily thanks to its rectangular shape taking very little space. It has 3 openings (a large one on the front, one on the right side and one on the left side).

Technical details :
Dimensions when disassembled: 9′ 6″ x 7′ x 2′ 3″ with an aluminium construction suitable for forklifts. Electrical connection included: 1x triple socket, 1x high voltage connector, 1x light panel with light switch.

Reference	Description	Height	Length	Width	Weight

The NORDIKA Christmas tree
better than a real one!

Did you know that the oldest tree in the world is a Christmas tree?
It is just 13 feet tall, is called “Old Tjikko” and has been growing in Sweden for 9955 years!!!

A real Christmas tree takes **30 to 40 years to grow to 40 feet.**
By selecting our Nordika trees which can be used again and again, you can help stop such forty-year-old real trees having to be felled. **Our trees come pre-lit with a SlowGlow effect, are easy to put up and store away, and make perfect replicas** of their real cousins thanks to their design and **realistic look.**
With additional options including tree toppers, non-light decorations, lighting and stands, you can choose a new theme every year.

Be eco-friendly and choose the Nordika Christmas tree solution!!!

PlayColors

Change the colour of the illuminations !

Play Colors is a smartphone application that allows the public to control, during a game session, the colour and animation of the Christmas tree in their town or shopping centre.

Changing the colour of the garlands in one click, throwing comets of light with your fingertips, and setting the rhythm of the light like a heartbeat by tapping the screen of your smartphone are just some of the games available on this application.

The selfie mode allows the user to immortalise the experience in front of the lighting site and share it on social networks, thus inviting friends to come and try the experience live.

Bioprint & Recyprint bi-season range

This new range of evolving urban furniture is composed of a luminous archway and a shade house equipped with spotlights and USB plugs changing over the seasons and according to the chosen classic decoration kit.
Le kit été est composé de décorations non lumineuses et le kit Noël est composé de décorations lumineuses et non lumineuses, qui se raccordent aux bases.

The kits can be assembled in our workshops (tell us during your order) or at home in complete autonomy.

For instance:
Arch Base + Christmas Arch Kit for a frosted look for the year-end celebrations
Or Shade House Base + Summer Arch Kit for a multicoloured summer look

120V

Guirlandes Lumineuses Sparklight® Led

Essential for any lighting project, the LED sparklight® 120V range offers a wide choice of garlands in terms of bulb and cable colours, readily adaptable for all types of surfaces and mountings.

As a result of our well-grounded experience and our continual research into LED technology, our sparklight® LED luminous garlands guarantee both Quality and Luminosity.
With their high degree of luminosity, incomparable life expectancy and very low energy consumption, LED Sparklight® luminous garlands are at the cutting edge of innovation.

LED Ceilings
LED luminous garlands

LED Luminous Ceilings

LED Luminous Ceilings are available as a big top, a roof for streets or as ceilings for sidewalk pavements.
We invite you to contact our sales department so that you can find a “ready to use” solution suited to the width of your street, making installation both simpler and faster in one short stroke.

flash + LED ceilings
LED luminous garlands

Illuminated flash LED ceilings

Illuminated flash LED ceilings consist of automatically flashing LEDs and enable you to design a sparkling starry sky.
They are ideal as complements to illuminated LED ceilings. The static part ensures constant lighting coverage with the flashes adding sparkles on top.
The LED Luminous Ceilings are available as a big top, a roof for streets or as ceilings for sidewalk pavements.

Blachere Illumination technical specifications

Universal fasteners

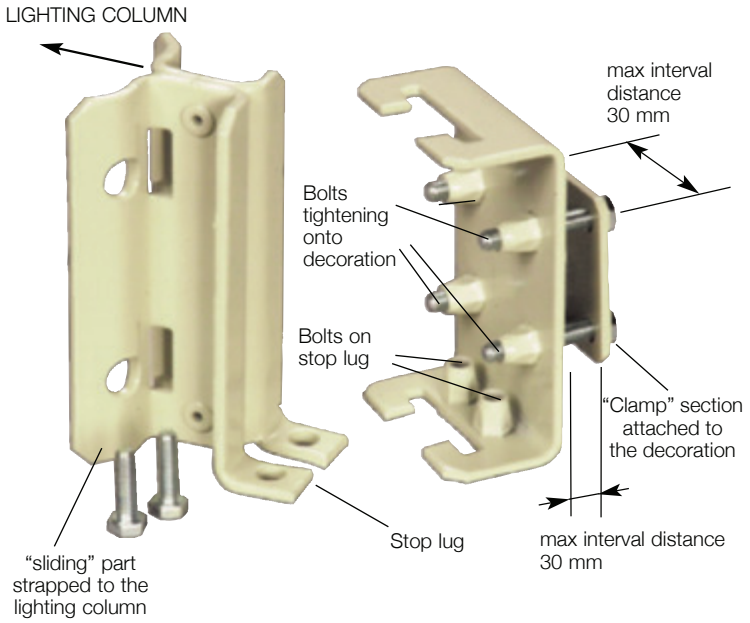
Pole and wall-mounted fastenings

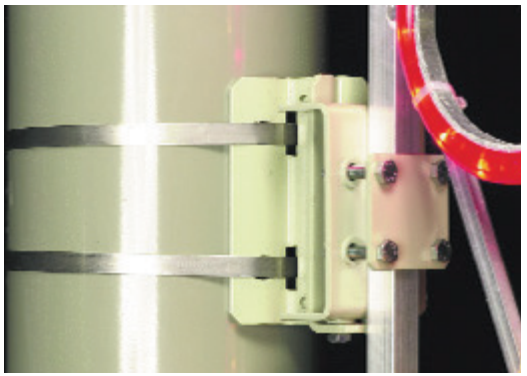
For your motifs mounted on poles, lighting columns or façades, the Blachère universal strap fastening system offers you the convenience of a simple and discrete solution.

Exclusive Blachère® system

This fastener makes it possible to permanently leave a slender and discrete part on the lighting pole (the "sliding" part), with the other part remaining fixed to the framework of the illuminated decoration (“clipping” part).
The advantage of this fastener is that it enables rapid and simple installation of the decoration onto the lighting column with the minimum of effort, while still retaining significant mechanical resistance (stainless steel).

It operates as follows:
• the “sliding” part is strapped by a stainless steel strip to the lighting column,
• the “clipping” part is fixed to the decoration’s framework using bolts,
• the “clipping” part is then threaded on to the “sliding” part.
The decoration is now held in place by the stop lug and leaves your hands free,
• 2 bolts located on the stop lug tighten the parts together and hold them in place.





Réf: FIX01
Box containing 2 fastening devices for poles.

Each fastener must be individually strapped twice (see diagram).

Réf: FIX01M
Box containing 2 fastening devices for façades.

For motifs exceeding a height of 10 ft, it is essential to use three fasteners per motif.
